

## In the Name of Allah

**Project Title :** Prj 2

**Programming Software :** Visual Studio Code , Version 1.73.1

**Programming language :** JavaScript

### Project Description :

1. Declare a variable called 'isIsland' and set its value according to your country. The variable should hold a Boolean value. Also declare a variable 'language', but don't assign it any value yet
2. Log the types of 'isIsland', 'population', 'country' and 'language' to the console

### Project Solution :

```
const country = 'Iran';  
let population = 85; //for 2021 in millions  
const isIsland = false;  
let language;  
console.log(typeof isIsland);  
console.log(typeof population);  
console.log(typeof country);  
console.log(typeof language);
```
